

Where's our music?

Now you are a registered member, you can get into the Music menu.

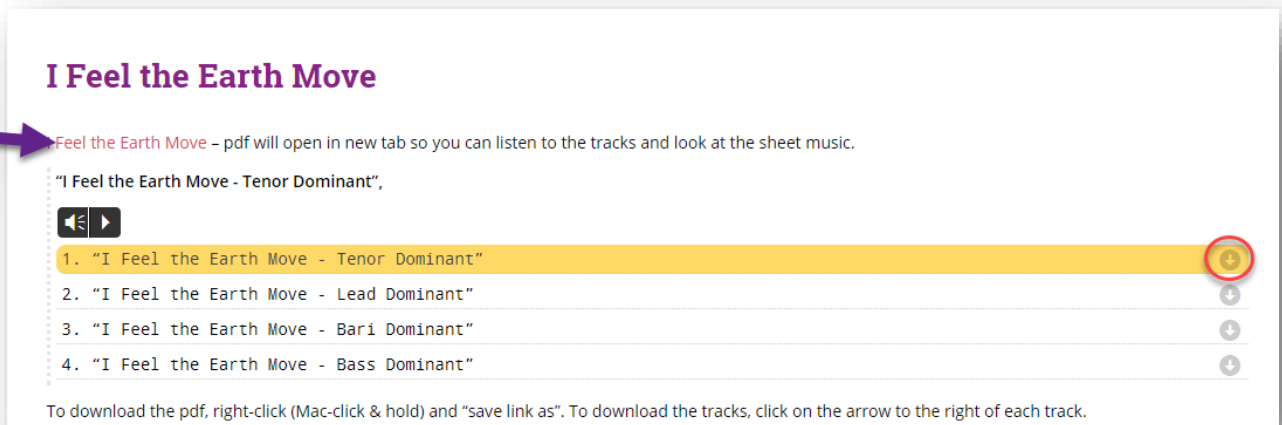

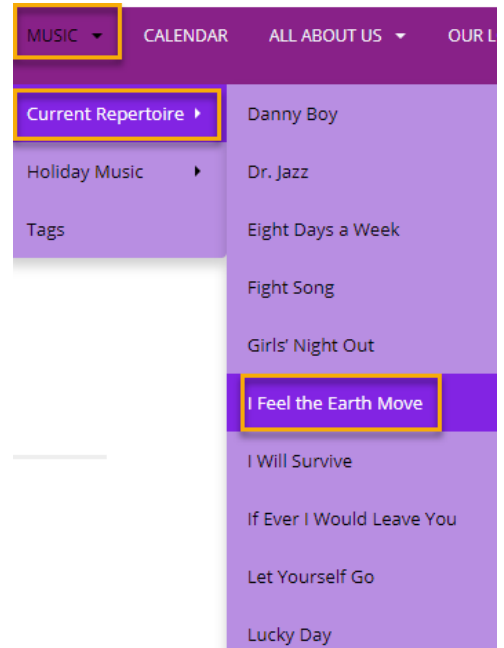

Click or tap the Music menu and you'll see the sub-menu options .

You will find our current repertoire listed in the sub-menu Current Repertoire. Click or tap onto the particular song you want to listen to.

The page for your chosen song will then open. Some pages have choreo videos, too!

Each song page will have the sheet music under the pdf link indicated by the purple arrow in the screen shot below.

To download your music, click on the arrow over to the right of the song.

When you click that arrow, you should see the file downloaded. It will be in whatever folder you have set for downloads on your PC. (Mac users may see something different happen.) Mobile users may also have a different experience. And if you are using Windows 10, you may see Groove open because it takes over the browser as the media player.
